

IP Legal and Compliance Review

Joint risk summary for closing-condition design

Issue	Risk	Required response
QS-102 contractor assignment	High	\$5m escrow; assignment and release before release
Restricted pilot data in training	Critical	remove, retrain affected adapter and independently validate
Network-exposed AGPL component	High	replace or obtain commercial license before close
Three customer consents	High	closing condition
Two employee assignments	Medium	confirmatory assignments
Fair-lending validation	Medium-high	expand segment and adverse-impact testing
AI performance marketing claim	Medium	narrow wording and retain substantiation file

Patent standard

Named inventors must be natural persons. The key diligence question is whether the named people made the legally relevant inventive contributions and assigned their rights. The demo does not treat an AI system as an inventor.
